

GT RADIAL POWERS SEADS ROUND 3 & 4 AT JIEXPO KEMAYORAN FEATURING INTERNATIONAL DRIFTER

DAN BURKETT

STRATEGIC SYNERGY BETWEEN GT RADIAL AND SUZUKI
IN ENHANCING TECHNICAL TEAM COMPETENCY

GT RADIAL POWERS SEADS ROUND 3 & 4 AT JIEXPO KEMAYORAN FEATURING INTERNATIONAL DRIFTER DAN BURKETT

SEADS (South East Asia Drift Series) Round 3 and Round 4, held on February 14–15, 2026 at JIExpo Kemayoran, Jakarta, delivered a high-octane and action-packed motorsport spectacle. The roar of engines, clouds of tire smoke, and precise, daring maneuvers from top drifters across various teams instantly ignited an intense competitive atmosphere. Every corner became a stage for skill and bravery, creating thrilling moments that kept spectators on the edge of their seats. The overwhelming enthusiasm from the crowd further cemented SEADS as one of the standout highlights in this year's motorsport calendar.

GT Radial elevated the excitement by bringing in its star drifter from the United States, Dan Burkett. His presence injected a world-class competitive edge into the event and became a major attraction for drifting fans. Showcasing an aggressive yet controlled driving style, Dan Burkett confidently tackled the track, going head-to-head with other drifters while delivering spectacular runs that captivated the audience. Each of his performances reflected the international experience and high standards he brought to the competition.

In this event, GT Radial drifters relied on Champiro SX2 tires as their primary choice to support drifting performance. Known for their optimal grip and high stability, these tires enable drivers to execute extreme maneuvers with confidence. GT Radial's participation in SEADS Round 3 and 4 demonstrates its ongoing commitment to supporting the growth of motorsport and automotive culture in Indonesia, while reinforcing its position as a brand closely connected to the racing world.

STRATEGIC SYNERGY BETWEEN GT RADIAL AND SUZUKI IN ENHANCING TECHNICAL TEAM COMPETENCY

PT Gajah Tunggal Tbk, through its flagship brand GT Radial, continues to strengthen its strategic collaboration with PT Suzuki Indomobil Motor as part of the Suzuki Technical Conference 2026 series. As a trusted OEM partner, GT Radial plays a role beyond tire supply, acting as a technical partner that actively supports vehicle quality improvement and the development of technical competencies among Suzuki's teams across Indonesia.

In the first quarter of 2026, the Suzuki Technical Conference for the West Java Region was successfully held in Bogor. The event served as an important platform for knowledge sharing and for reinforcing strong partnerships between principals and strategic

partners in responding to the evolving dynamics of the automotive industry.

During the conference, GT Radial contributed by delivering technical tire training to mechanics from Suzuki's service and dealer network, with a focus on enhancing mechanical skills to support consumer safety and service excellence. This active involvement reflects GT Radial's commitment to supporting higher service standards, improving customer satisfaction, and fostering sustainable collaboration within Indonesia's automotive ecosystem.
